Marcin Krasowski

Date of birth: 1970.11.09
Address: Ul. Afrykańska 16C/27, 03-966 Warszawa
Phone: +48-503600061
E-mail: marcin.krasowski@gmail.com

Education

1991 - 1996 The university of Warsaw, Faculty of Chemistry

1990 – 1991 Warsaw Technical University, Faculty of Electronics and Information Technologies, Institute of Telecomunications

1989 – 1990 Warsaw Technical University, Faculty of Chemistry

1985 – 1989 II L.O. im. St. Batorego – Warsaw

Experience

Extreme Robotics (1 year) – senior software engineer
Viacom (15 months) – senior software engineer in tests
Netcompany(7 months) – senior software developer
Cinema City (2 years) – senior software developer/devops
Globema S.A. (1 year) – software designer. Geolocation technologies.
GTech Poland (8 years) – senior software engineer**,** jee developer/technical team leader
Poczta Polska (Polish Post) (2years) – Inter/Intra-net application programmer, internal consultant
WebLab (2years) – senior technical consultant, programmer, RealVideo – content production and streaming, LAN/WAN – administration

Internet Partners (1year) –
As a webmaster and advanced technical support
Donajski's Studio (1 year) – content managment, web development
Hantpol S.C (1 year) – biotechnology
Chemical analisys of waste waters and other industrial waste.

Languages

English – fluent both written and spoken
Russian – intermediate.

Computer skills

Technologies
Java(with Spring, Hibernate, JEE, JavaFX, etc.) Javascript(NodeJS), Groovy, Kotlin, Perl, PHP, Python, Ruby, MSSQL, IBM DB2, MySQL, PostgreSQL, Oracle, XML, XSLT, HTML5 , JavaScript, jQuery, and many others
Application Servers
Jboss/Wildfly , Tomcat, Websphere, Spring Boot, Weblogic others
DEVOPS
Linux, Puppet, Jenkins, ELK, Docker, Git etc.

Interests

Electronics, IoT, Arduino, Raspberry Pi, etc.

Awards

A few …

Organizations

None

additional information

Extreme Robotics (2019-2020)

Development and maintenance of the automated regression tests for company's RDA product. Technologies related to JavaFX (TestFX, JNI) but also Spring and Vaadin. Created a supporting tools like recording desktop during test execution. Creating Jenkins/Gitlab CI/CD pipelines. Logs and events collecting using ELK stack.

Viacom (2018-2019)

In the team the delivers new authentication and authorization solution for TV.
- Creating and maintaining set of test cases/test scenarios.
- Creating automated test on several platforms - web, mobile(Android, iOS), connected TV(Roku). [Selenium/Appium and internally developed solutions]
- Maintenance of demo apps for (Android, iOS, Roku).
- Development of authentication/authorization client SDK and the demo app using it on Roku platform (BrightScript)

Netcompany(2017-2018)

Maintenance and development of danish public social insurance support system. Defect analysis, bug fixing, adding unit test to enable refactoring of legacy code. Creating multimedia documentation of system usage and functionality.

Cinema City (2014-2017) I was a member of the team (10 people) that took over Cineworld (UK) development and maintenance web part of IT infrastructure. We were adding required business functionalities along with refactoring code and infrastructure to make the more 'agile' capable. In the second year I became a member of DEVOPS team (2 people) and focused on improving various aspects (architecture, performance) of infrastructure.

In **Globema (2013-2014)** I was in the team creating desktop GIS type application that was supposed to improve natural gas delivery pipe network maintenance. The app was based on Eclipse RCP and uGIS http://udig.refractions.net/ and I was involved in creating functionalities like indexing and search equipment type and location and authorization subsystem.

In **Gtech (2004-2012)** I was a member and later technical team leader in project for lotteries in UK and Ireland and also involved in EuroJackport project in part of co-designing and implementing solution providing secure communication from party lotteries and the office where actual draw was taking place.

In **Poczta Polska (2004-2002)** – beside of the programmer duties I was also involved in collecting the requirements and providing solution proposal to number of inter- and intra- net web applications and was coordinating project of implementing internal DNS server in WAN.
